Grace Mathis

What about recycled materials for post bags, if HealthPost can use them, surely NZ post can sell them instead of those one use plastic post bags.

3

Katherine Bol-Griffiths

Please replace your plastic courier bags with something compostable or even a cardboard that is recyclable! The single use plastic bags need to go asap

3

Kez Tanner

Why don't U get rid of plastic post bag make paper and cardboard options cheaper be smart NZ post

4

Lois Carlos

Thank you for thinking about getting to a more sustainable level in your daily operations. However, one of your organisations' big contribution as well is the plastic packaging that might end up in the landfill or our oceans. We've been waiting for you to come up with a more sustainable option on this but it's been taking too long. Please can you take a look at this? It would be good if we have different range of options that's affordable. Thanks again.

5

Caroline Henwood

Great idea - but when are you planning of offering paper and other compostable courier bags rather than plastic ones? This would be even better and a great next step towards reducing single use plastic in our lives!
